REPORT

on
8 Samples of Permanent Record Film

Submitted by
Central Intelligence Agency
(Attn.)
Washington 25, D. C.

Reference: Your letter of June 16, 1951.

For permanent records it is recommended that the hypo content of permanent record film not exceed 0.005 mg per square inch.

The results of the tests on the 8 samples of 16 mm permanent record film were as follows:

Samples (90A and 92A) tested 0.005 mg of hypo per square inch. Samples (79A, 81A, 86A, 88A, and 94A) tested less than 0.005 mg of hypo per square inch.

For the Director,

Raymond Davis

Raymond Davis, Chief
Photo Technology Section
Optics & Metrology Division
